Stefan Hampden, Matt Hutchins

CAST Design/Build

4216 Sixth Ave. NW

206.256.9886; cast-db.com

Cost: Variable, but new construction or remodels range from \$125 to \$250 per square foot. Typically the firm comes within 5 percent of the original estimate.

“Most people hear of us by driving by one of our projects they like,” says Matt Hutchins. If they got out of the car, they’d have a good shot at seeing one of CAST’s owners in action. Unlike most design/build firms, this three-man shop does the designing and much of the building themselves—from hanging doors and drywall to finish cabinetry and metalworking. “It allows us to do higher-end design, without applying higher costs,” explains Hutchins of the benefit of their system. CAST restricts itself to remodels and new construction in established in-city neighborhoods. Says Hutchins, “It’s our little way of combating sprawl.”

Testimonial: “Very organized, excellent problem solvers and always on time.”
